SSS10

10th International Space Syntax Symposium

Sponsorship Prospectus

Space Syntax Symposium 10, 13-17 July 2015, University College London

The biennial Space Syntax Symposium is the global gathering for researchers who use the space syntax methodology, developed at UCL. Since the first Symposium in 1997, the international research community has grown enormously, with conferences held around the world, in cities including Atlanta, Brasilia, Delft, Istanbul, Santiago, Seoul and Stockholm. Space Syntax Symposia attract a remarkable range of people, with many attendees working in consultancy and design practice as well as an international research community.

For its tenth edition, the Space Syntax Symposium returns to its London home. With over 200 papers submitted from 51 different countries, this is expected to be the largest yet held. The space syntax community is highly diverse, and includes established and up-and-coming researchers working in fields from architecture, urban design, computation and cognition, to anthropology, archaeology, economics, geography, history, planning, risk management, sociology, transport and more. It provides a very good opportunity to communicate with an international audience of experts in their field who only come together at this event.

Sponsor Benefits	Gold	Silver	Bronze
* Note: there is only a limited number of packages in each category *	£2,500	£1,000	£500
Three free tickets to opening conference reception at the UCL North Cloisters.	•
